- CURRENT EVENTS -

We have all seen what has been happening in Afghanistan over the last couple weeks. Please be aware that while this is happening and getting all of the MSM coverage, you are having rights stripped away!

The current administration has just placed a 12 month ban on all ammunition and firearms manufactured in Russia.

What does this mean for you? Ammunition prices will start to inflate even higher than they already are. Russia produces and exports the vast majority of the low-cost, steel-cased ammunition available in the US. With a ban on this low cost ammunition, the brass-cased US manufacturers will no longer have anything to compete with, and they will no longer be able to keep up with even steady demand. We are predicting an increase in brass-cased ammunition costs of up to 50% within the next couple months.

The ban will be removed if Russia meets certain requirements on chemical weapons production and use. However, if Russia does not meet these requirements in the next 12 months, then the ban will become more permanent.

Stay vigilant, and as always, I appreciate your patronage, and look forward to seeing you again!
